YAUHENI BUKA

Junior Product Engineer | Software Engineer

Warsaw, Poland | +48 571 333 394 | yauhenibuka@gmail.com

github.com/slading | yauheni-buka.vercel.app

PROFILE

Product-focused software engineer building practical web applications, backend services and AI-assisted workflows. Delivered a production booking system for a real two-salon business. Uses an AI-native engineering workflow combining clear specifications, scoped implementation, independent review, automated testing and release verification.

SELECTED PROJECTS

N2D Nails - Production Booking System | GitHub

- Developed and deployed a booking system for a two-salon business, including customer reservations and authenticated staff workflows.
- Implemented Supabase authentication, availability rules, scheduling, rescheduling and cancellation; deployed on Vercel and worked with the business owner on requirements and improvements.

AI RFQ Operations Agent - Engineering Prototype | GitHub

- Built a deterministic foundation for processing requests for quotation, including customer identification, line-item resolution and quote calculations.
- Implemented explicit human-review boundaries and verified functionality with fixture-based integration tests and regression checks; not presented as a production AI automation system.

SentinelAI - Transaction Risk Analysis Prototype | GitHub

- Developed a Python/FastAPI pipeline combining deterministic transaction analysis with LLM-assisted structured outputs.
- Worked with Pydantic, Groq, REST/SSE interfaces and audit logging, with Vercel and Docker deployment paths.

TECHNICAL SKILLS

Languages and backend: Python, TypeScript, JavaScript, SQL, FastAPI, Node.js, REST APIs
Data and platform: Supabase, Pydantic, Git/GitHub, Docker, Vercel
Engineering workflow: Automated testing, LLM APIs, structured outputs, AI coding agents

EDUCATION

CKU #1, Warsaw - General secondary education for adults | Expected 2027

LANGUAGES

English - Fluent | **Polish** - B2 | **Russian** - Native
